

# KiWi Alternative Income Fund (Master)

MARCH 2025

## Investment Strategy

KiWi Alternative Income Fund (the "Fund"), the Bermuda-domiciled offering of Kilgour Williams Capital's small business credit strategy, invests in small business loans via fintech. The Fund is managed by Kilgour Williams Capital and aims to generate regular monthly distributions to investors. Leveraging its credit expertise, the firm uses proprietary models to guide its selection of loans with the highest return-for-risk and maximizes portfolio diversification to mitigate risk. No single loan represents more than 2% of the portfolio and target duration is less than 18 months.

## March 2025 Commentary

The Fund was launched in April 2023 and is currently generating a 1-year return of 16.0% (net).

The Fund continues to provide strong distributions with minimal volatility despite economic uncertainty. We note that companies that are active in tariff-sensitive sectors (automotive, steel, industrial, etc.) are generally not small businesses and therefore not represented by the loans in our portfolio. We are also actively avoiding sectors and businesses with cross-border supply chains (e.g. importers of Chinese manufactured products) and those with exposure to inflated input cost (e.g. transportation and construction/contracting).

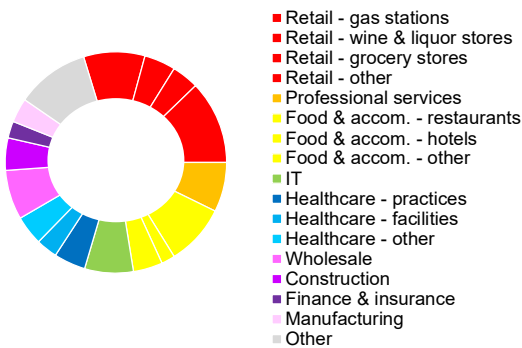

Delinquency levels are benign and in line with historical trends. Our fintech partners are providing excellent deal flow at high expected yields. The portfolio remains diversified across more than 800 loans to small businesses in counter-cyclical and cycle-neutral sectors across the US. The loans have terms generally under two years and are fully amortizing (mostly daily / weekly pay).
